RAMIRO VITTOR

DATA ANALYST

Córdoba Capital, Argentina | 3513997192 | ramirovittor@gmail.com | linkedin.com/in/ramiro-vittor

PROFESSIONAL SUMMARY

Advanced Information Systems Engineering student with experience in Business Intelligence (BI) dashboard development, end-to-end automation, backend development, and Generative AI solutions. Skilled in integrating and validating data from multiple sources using SQL and ETL/ELT processes to reduce manual tasks and improve operational efficiency. Business-oriented, with the ability to translate requirements into technical solutions, focusing on quality, traceability, scalability, and continuous improvement.

KEY SKILLS & COMPETENCIES

- Automation & AI: Python, n8n, end-to-end automation, AI agents, bots, LLMs, RAG, LangChain, LangGraph, prompt engineering, and AI assistants.
- Backend Development & Integrations: Python, FastAPI, REST APIs, Java, Spring Boot, JavaScript, Node.js, Express, process integration, and data retrieval from multiple sources.
- Data & Analytics: SQL, SQL Server, T-SQL, Databricks, Pandas, NumPy, Spark, ETL/ELT, data quality, validation, consistency, and traceability.
- Tools & Methodologies: Power BI, Git, Linux, Excel, CI/CD, requirements analysis, problem-solving, and product-oriented mindset.

PROFESSIONAL EXPERIENCE

Data Analyst | Mi Contacto Web Inc. | September 2024 - Present

- Design, implement, and maintain end-to-end automations and ETL/ELT pipelines using Python, Apache Airflow, and n8n to integrate data sources, perform validations, and reduce manual tasks.
- Implement Generative AI solutions and RAG (Retrieval-Augmented Generation) assistants to query financial information and support business needs.
- Develop AI agents for monitoring, data quality assurance, and automated report generation.
- Analyze financial, tax, and commercial data across multiple clients and organizations to identify improvement opportunities, ensuring data quality, consistency, and traceability.
- Use Python, SQL Server / T-SQL, and Databricks to extract, clean, transform, and analyze data, perform data integrity checks, and integrate information from multiple sources.
- Develop Business Intelligence solutions for local governments, integrating revenue, expenditures, and budget execution data into management dashboards and KPIs using Power BI and Excel.

Systems Analyst Thesis Project | UTN FRC | August 2026 – Present

- Develop a web application for custom furniture design and management, targeting independent carpenters and small workshops. The platform enables project management, parameterized furniture configuration, material and dimension calculations, cutting layout optimization, cost estimation, and budget generation. It also includes 2D and 3D modeling capabilities for design visualization, along with material price comparison tools.

Swimming Instructor & Lifeguard | Campo Deportivo Inc. | September 2023 - September 2024

- Coordinated groups of different age ranges, planned activities, and demonstrated responsibility, adaptability, and quick decision-making in dynamic situations.

EDUCATION & TRAINING

Information Systems Engineering (Degree in Progress) | National Technological University (UTN), Córdoba Regional Faculty | 2021 – Present

Courses & Certifications:

- Data Analysis with Python | freeCodeCamp.| Numpy, Pandas, Matplotlib, Seaborn.
- Machine Learning with Python | Udemy | Scikit-learn, Keras, TensorFlow, PyTorch.
- Probability and Statistics Training.
